Security page commits to WCAG 2.1 accessibility compliance "by 2025" — a deadline that has already passed

Most Secure Text to Speech AI Voice Generator | WellSaid · https://www.wellsaid.io/features/features-security

HELP ARTICLE

CURRENT

We are committed to meet WCAG 2.1 and other national standards, working towards compliance in these areas by 2025.

SUGGESTED FIX

Today is 2026-06-21 — the stated 'by 2025' target is in the past. Either update the date to the current/next target year, restate as completed ('As of 2025, we meet WCAG 2.1...'), or remove the forward-looking deadline. A prospect or procurement/legal reviewer reading an overdue compliance commitment on the security page may read it as an unmet obligation.

WHAT CHANGED

This is a newly-published page this week (https://www.wellsaid.io/features/features-security; the prior /features/security page was removed). Its Accessibility section reads 'We are committed to meet WCAG 2.1 and other national standards, working towards compliance in these areas by 2025.' Today is 2026-06-21, so the 2025 target date has elapsed. The rest of the section is forward-looking ('working towards'), so the page implies the WCAG 2.1 goal is still in progress past its own deadline. Not present in the carried-forward finding set.

Screenshot shows legacy 'MY LIBRARY' page with green 'NEW WORD' button that no longer exists

Importing and Exporting Your Pronunciation Library · help.wellsaid.io/…/39079455127827-Importing-and-Exporting-Your-Pronunciation-Library

ARTICLE SCREENSHOT

Green 'NEW WORD' button (now 'New Replacement')

LIVE UI

'New replacement' panel header in the right-side script-editor side panel (Section 1 > New replacement). Demonstrates th

SUGGESTED FIX

The library page is now called 'Libraries' and the primary action button to add a replacement is 'New Replacement' (not 'NEW WORD'). Per the terminology rubric, 'PRONUNCIATION' has been renamed to 'Replacements' product-wide.

WHAT CHANGED

Article body references navigating to 'Pronunciation from the left menu' but live Studio left-nav now uses 'Libraries' (see right-rail-voices.png reference showing 'Open libraries' and 'New replacement' instead of 'New word'). Related article 39113078033555 text explicitly says 'select New Replacement' when adding from the library, confirming the current button label.

ARTICLE help.wellsaid.io/…/39079455127827-Importing-and-Exporting-Your-Pronunciation-Library

DR-0051 Warning Image Replacements

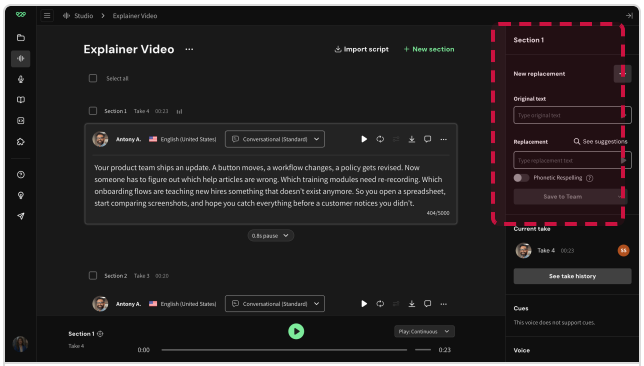

Pronunciation Library screenshot shows outdated 'MY LIBRARY' page with alphabetical index and old button labels

Applying Respelling Suggestions · help.wellsaid.io/…/39106324166547-Applying-Respelling-Suggestions

ARTICLE SCREENSHOT

'MY LIBRARY' page title (now 'Libraries')

LIVE UI

Right-rail 'New replacement' form (Section 1 header through Save to Team) — the modern equivalent of the legacy MY LIBRARY page

SUGGESTED FIX

Current Studio navigation labels this area 'Libraries' (not 'MY LIBRARY') and the product-wide rename replaces 'Pronunciation/My Library' terminology with 'Replacements'. The legacy alphabetical listing UI no longer appears; users open the Replacements panel from the right sidebar ('Open libraries') or the Libraries page from the left navigation.

WHAT CHANGED

Article body says 'Head to the Library from the left-hand menu' and references the 'Replacements panel' and 'Replacement toolbar'. Reference right-rail-voices.png shows 'Replacements' header with an 'Open libraries' button and no alphabetical 'MY LIBRARY' view. Terminology rubric: 'PRONUNCIATION' right rail gone, replaced with 'Replacements'.

Project card shows outdated 'Caruso (Beta)' label for a model no longer in beta

Deleting a Project · help.wellsaid.io/…/39079161481619-Deleting-a-Project

ARTICLE SCREENSHOT

Highlights the 'Caruso (Beta)' label on the project card

LIVE UI

Project card with 'Standard' label and no '(Beta)' tag — Caruso/Beta designation removed

SUGGESTED FIX

Caruso is no longer a beta feature; it is a production model. Project types on the live product are 'WellSaid Studio', 'Legacy Studio - Standard', and 'Legacy Studio - Global'. The 'Current / Future BETA' designation has been removed in all modes per the drift rubric.

WHAT CHANGED

Drift rubric states 'Current / Future BETA dropdown gone in all modes'. Article 40960191236371 (Sample Rates) and others now describe Caruso as 'our most advanced model' without beta qualification. Article 39122054203795 lists current project types as 'WellSaid Studio (Recommended)' and 'Legacy Studio - Standard and Global' with no beta label.

ARTICLE help.wellsaid.io/…/39079161481619-Deleting-a-Project

Pause-length preset labeled 'Short (0.3s)' here vs 'Small (0.3s)' in the dedicated Control Pauses article

Creating a Longer Clip with the Combine Tool · help.wellsaid.io/…/39404298753299-Creating-a-Longer-Clip-with-the-Combine-Tool

HELP ARTICLE

CURRENT

Short (0.3s)

SUGGESTED FIX

The dedicated 'Control Pauses Between Sections and Continuous Playback' article (also updated 2026-05-19) labels the 0.3-second preset 'Small (0.3s)'. Both articles describe the same Pause between sections preset selector. Update the Combine Tool article to 'Small (0.3s)' to match the canonical pause article, or align both to whichever label the live Studio UI shows.

WHAT CHANGED

Both articles were updated on the same day (2026-05-19) but disagree on the 0.3s preset's name. Combine Tool article lists 'Short (0.3s) / Natural (0.8s) / Long (1.2s)' under 'Choose a pause length between sections'. Control Pauses article lists 'Small (0.3s) / Natural (0.8s) / Long (1.2s)' under 'Under Pause between sections, select a preset'. The 0.8s and 1.2s presets and the contextual phrasing ('Pause between sections') match — only the 0.3s label diverges, indicating a copy-paste / cross-article terminology drift.

ARTICLE help.wellsaid.io/…/39404298753299-Creating-a-Longer-Clip-with-the-Combine-Tool

DR-0075 Warning Text WellSaid News

Voice retirement / plan-restriction announcements still phrased in future tense for a May 20, 2026 event that has already occurred

Retiring Sonny G. from the WellSaid Voice Library · help.wellsaid.io/…/51806828542099-Retiring-Sonny-G-from-the-WellSaid-Voice-Library

HELP ARTICLE

CURRENT

On May 20, 2026, Sonny G.'s voice will be retired from the WellSaid Voice Library.

SUGGESTED FIX

Today is 2026-05-25 — the May 20 retirement has already happened. The article should be rewritten in past tense or as-of framing (e.g. 'As of May 20, 2026, Sonny G.'s voice has been retired from the WellSaid Voice Library'). The sibling article 'Accessing Tobin A.' has the same drift pattern ('Starting May 20, 2026, Tobin A. will only be available on managed Business and Enterprise plans.') and should be updated in the same pass.

WHAT CHANGED

Both newly published help-center articles announce voice-library changes effective May 20, 2026. Today is 2026-05-25 (5 days past). The Sonny G. page still says 'will be retired' / 'will no longer be available' and the Tobin A. page still says 'Starting May 20, 2026... will only be available' — readers landing on either page today get a future-tense framing for an event that has already taken effect, which is misleading about whether their existing content / projects are still affected or still being prepared for change.

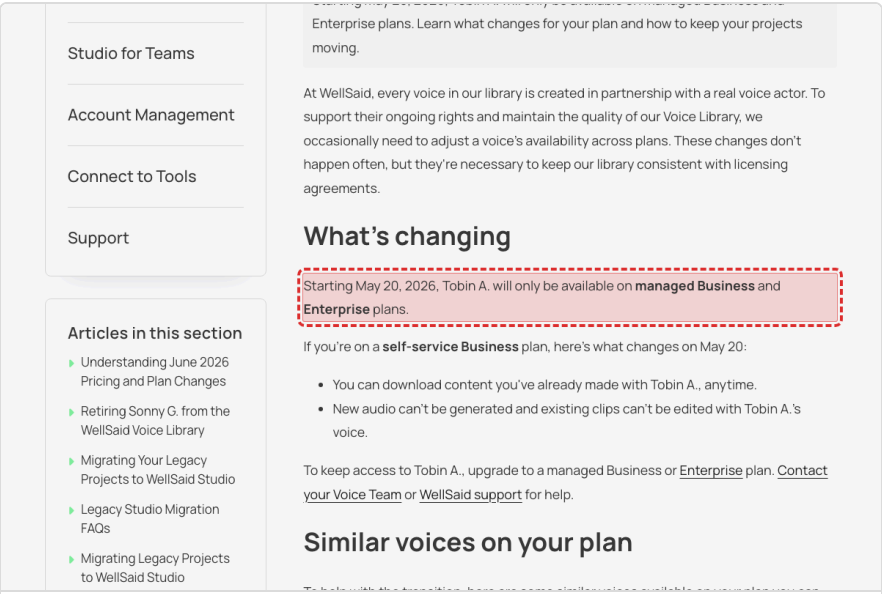

ARTICLE help.wellsaid.io/…/51806828542099-Retiring-Sonny-G-from-the-WellSaid-Voice-Library

Tobin A. plan-restriction announcement uses future tense for a May 20, 2026 change that has already taken effect

Accessing Tobin A. · help.wellsaid.io/…/47141067116947-Accessing-Tobin-A

HELP ARTICLE

CURRENT

Starting May 20, 2026, Tobin A. will only be available on managed Business and Enterprise plans.

SUGGESTED FIX

Today is 2026-05-25 — the May 20 change has already taken effect. Rewrite to past tense or as-of framing (e.g. 'As of May 20, 2026, Tobin A. is only available on managed Business and Enterprise plans.'). The sibling 'Retiring Sonny G.' article has the same drift pattern and should be updated in the same pass — see related finding 51806828542099-Retiring-Sonny-G-stale-future-tense.

WHAT CHANGED

Article body still uses 'Starting May 20, 2026, Tobin A. will only be available...' and 'here's what changes on May 20' framing for an event 5 days in the past. The FAQ also says 'All content created before May 20, 2026 remains accessible' which is correctly past-anchored, but the headline framing in the body has not been flipped from future to past tense. Same pattern as Sonny G. retirement article — both updated 2026-05-18 ahead of the May 20 effective date but not refreshed afterward.

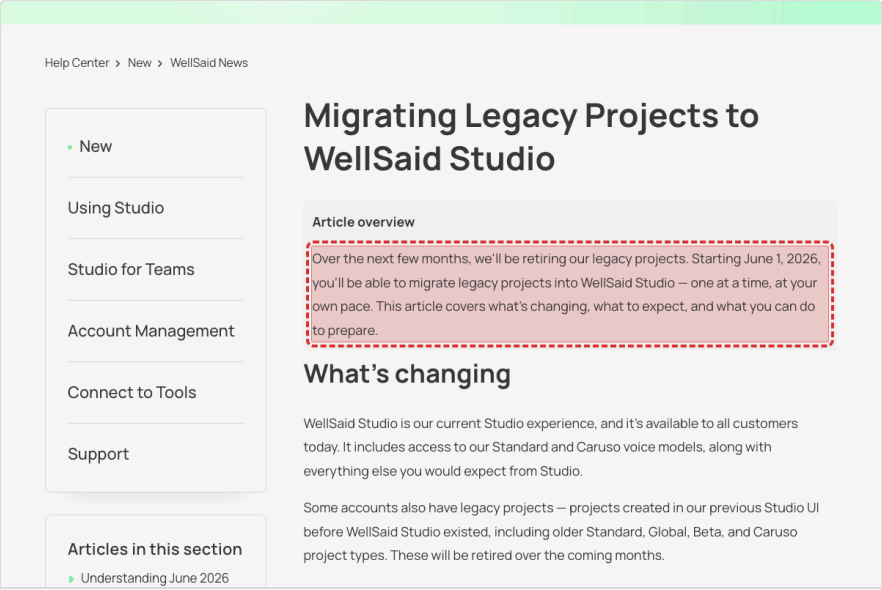

ARTICLE help.wellsaid.io/…/47141067116947-Accessing-Tobin-A **FIRST SEEN** 2026-05-25 — also in 10 prior scans

DR-0080 Warning Text WellSaid News

Legacy-migration preview article still uses future tense for the June 1, 2026 migration that has already gone live, and promises a guide "in June" that is already published

Migrating Legacy Projects to WellSaid Studio · help.wellsaid.io/…/51253958068755-Migrating-Legacy-Projects-to-WellSaid-Studio

HELP ARTICLE

CURRENT

Starting June 1, 2026, you'll be able to migrate legacy projects into WellSaid Studio — one at a time, at your own pace.

SUGGESTED FIX

Today is 2026-06-07 — the June 1 migration has already opened (the companion full guide 'Migrating Your Legacy Projects to WellSaid Studio' (51751205121299) now says 'Starting June 1, 2026, you can migrate your legacy projects'). This older preview article (created 2026-04-29) should be rewritten in present/as-of framing (e.g. 'You can now migrate your legacy projects into WellSaid Studio — one at a time, at your own pace.') and the line 'We'll be sharing a complete migration guide in June.' should be replaced with a link to the now-published guide. Consider whether this preview article is still needed at all now that the full guide and FAQs exist, or redirect it.

WHAT CHANGED

Article 51253958068755 (last updated 2026-06-05) still reads 'Starting June 1, 2026, you'll be able to migrate legacy projects', 'Migration is not automatic. Starting in June, you'll be able to migrate projects one at a time', and 'We'll be sharing a complete migration guide in June.' Today is 2026-06-07, six days past June 1. Migration is already live: the companion guide 51751205121299 (published 2026-05-15) uses present tense ('you can migrate your legacy projects') and the dated timeline table lists 'June 1, 2026 — Migration opens.' A reader landing on this preview article today is told migration is a future capability and that a complete guide is still forthcoming, when both already exist. Same future-tense staleness pattern as the carried-forward May 20 findings (Sonny G. / Tobin A.) but on a different page and date, so not a duplicate of any carry-forward.

Typo '24k Hz' (should be '24 kHz') in the Business column of the newly-rebuilt pricing comparison table

Pricing | WellSaid AI Voice Studio · https://www.wellsaid.io/ai-voice-pricing

HELP ARTICLE

CURRENT

24k Hz, 48 kHz

SUGGESTED FIX

Should read '24 kHz, 48 kHz' to match the unit formatting used in every other sample-rate cell on the page (24 kHz / 48 kHz / 96 kHz). The Business plan's sample-rates cell renders the kilohertz unit as '24k Hz' (misplaced space) only in this one cell.

WHAT CHANGED

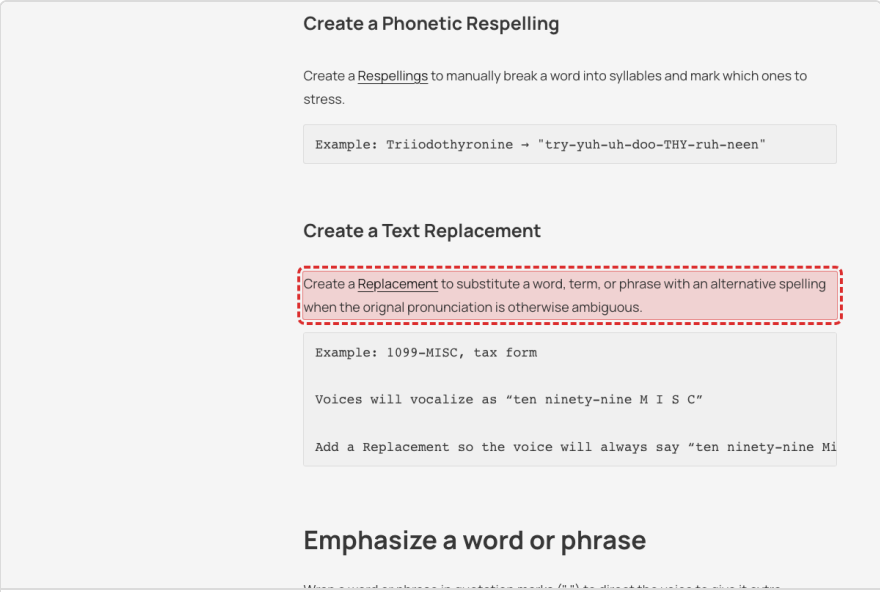

The pricing page was substantially rebuilt this week for the June 2026 Starter/Pro plan change (reason content_changed in the diff). In the 'Compare all plans & features' table, the Sample rates row reads '24 kHz | 24 kHz | 24 kHz, 48 kHz | 24k Hz, 48 kHz | 24 kHz, 48 kHz, 96 kHz'. Every cell uses '24 kHz' except the Business column, which is mis-typed as '24k Hz'. Cosmetic only — no factual impact — but it appears in freshly-shipped pricing copy. Not present in the carried-forward finding set.

DR-0037 Info Text Pronunciation

Typo 'orignal' instead of 'original' in Pronunciation Best Practices

Pronunciation Best Practices · help.wellsaid.io/…/39076041586707-Pronunciation-Best-Practices

HELP ARTICLE

CURRENT

Article says 'when the orignal pronunciation is otherwise ambiguous'

SUGGESTED FIX

Should read 'when the original pronunciation is otherwise ambiguous'

WHAT CHANGED

The word 'orignal' in the 'Create a Text Replacement' section is a clear misspelling of 'original'. This typo exists in the current crawled text (updated 2026-04-18).

DR-0061 Info Image FAQs

Screenshot shows pre-2026 Studio editor (no sidebar, all-caps 'CREATE', 'Latest' model dropdown)

Inside Studio's 5000-Character Limit · help.wellsaid.io/…/39050521937299-Inside-Studio-s-5000-Character-Limit

ARTICLE SCREENSHOT

All-caps 'CREATE' button (now 'Create single take')

LIVE UI

Title-case 'Create single take' button (replaces all-caps 'CREATE')

SUGGESTED FIX

Current Legacy Standard UI uses title-case 'Create single take' button (per legacy-standard-editor ref); WellSaid Studio uses inline section play icon. 'Latest' model dropdown is no longer part of the voice header.

WHAT CHANGED

Compared to legacy-standard-editor ref: current Legacy shows a title-case 'Create single take' button with dropdown caret and a right-rail Replacements+Voices. Screenshot predates both Legacy and new Studio layouts.

DR-0071 Info Video

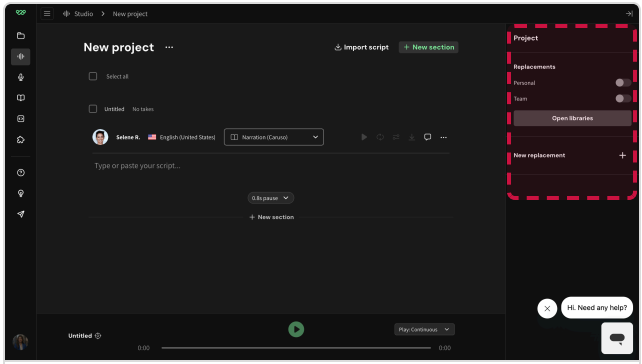

Right rail: 'PRONUNCIATION' section replaced by 'Replacements'

Tutorial: Create Clips · https://www.youtube.com/watch?v=8S9M01NwEpw

ARTICLE SCREENSHOT

Right rail with PRONUNCIATION, RECENTLY USED, SEE ALL AVATARS, MY FAVORITES

LIVE UI

right-hand rail showing 'Project' header, 'Replacements' section with Personal/Team toggles, 'Open libraries' button and

SUGGESTED FIX

The right rail no longer contains the voice picker or the phonetic pronunciation form. The current rail is titled 'Project > Replacements' with Personal/Team toggles, an 'Open libraries' button, and a 'New replacement' affordance. The pronunciation concept evolved into the broader Replacements + Libraries feature.

WHAT CHANGED

Current-app capture of the editor right rail.

A recreation plan for this video is available in Drift Monitor.

DR-0079 Info Text Getting Started

Combine FAQ calls 48 kHz 'the highest supported sample rate' while the same page and the sample-rate article document 96 kHz

Creating a Longer Clip with the Combine Tool · help.wellsaid.io/…/39404298753299-Creating-a-Longer-Clip-with-the-Combine-Tool

HELP ARTICLE

CURRENT

The combined file uses 48 kHz, the highest supported sample rate.

SUGGESTED FIX

Reword to avoid the contradiction, e.g. 'The combined file uses 48 kHz, the higher of the two input rates.' 96 kHz is a supported rendering rate per 'Creating Audio at Different Sample Rates'.

WHAT CHANGED

Two FAQ entries earlier on the same page discuss combining 96 kHz files ('Files rendered at 96 kHz are limited by total file size', 'The 96 kHz files will be downsampled'), and 'Creating Audio at Different Sample Rates' (article 40960191236371) lists 24/48/96 kHz as available rates. Calling 48 kHz the highest supported rate contradicts both.

How to read it

WellSaid Drift Monitor compares your published content with your sources of truth on every scan. When they disagree it raises an alert with the evidence, where it appears and a suggested fix. Severity reflects how likely the gap is to mislead a learner or customer: critical first, then warning, then info.

Findings are advisory. Please verify content before making changes.
