DR-0097 Critical Text Team Management and Setup

The SSO article's OpenID Connect section now lists the SAML settings by mistake — the OIDC values IT needs are gone

Single Sign-On Documentation · help.wellsaid.io/…/39177011880979-Single-Sign-On-Documentation

Entity ID	`urn:auth0:wellsaidlabs:XXX-saml`
ACS URL	`https://auth.wellsaidlabs.com/login/callback?connection=XXX-saml`
SP initiated	`true`
SP certificate	`https://auth.wellsaidlabs.com/pem`
Attributes	`firstname, lastname, email` — must be included in the SAML response

`XXX` *is replaced with the values assigned to your team.*

Open ID Connect (OIDC)

Values your technical contact provides:

Value	Example
Sign-in URL	`https://samlp.example.com/login`
Sign-out URL (if enabled)	`https://samlp.example.com/logout`
X.509 signing certificate	–

Values WellSaid provides:

HELP ARTICLE

CURRENT

Open ID Connect (OIDC)

SUGGESTED FIX

Restore the OpenID Connect values that were replaced with duplicated SAML values during the July 31 rewrite. Under "Open ID Connect (OIDC)", the values your technical contact provides are Issuer URL, Client ID, and Provider domain (example: wellsaid.io) — not a SAML sign-in URL or an X.509 signing certificate. The values WellSaid provides are Redirect URL: https://auth.wellsaidlabs.com/login/callback, Initiative login URL: https://studio.wellsaidlabs.com/auth/sso?connection=XXX, and Logout URL: https://auth.wellsaidlabs.com/logout — not an Entity ID, ACS URL, SP certificate, or SAML attribute list.

WHAT CHANGED

The "Open ID Connect (OIDC)" section is now a word-for-word copy of the SAML section directly above it: same sign-in URL example (https://samlp.example.com/login), same X.509 signing certificate row, same Entity ID (urn:auth0:wellsaidlabs:XXX-saml), same ACS URL ending in -saml, and the same line "firstname, lastname, email — must be included in the SAML response." An Enterprise IT team setting up OIDC has nothing correct to work from, and every value on the page points them at a SAML connection instead. The four OIDC-specific values (Issuer URL, Client ID, Redirect URL, Initiative login URL) were published on this page as recently as the July 26 scan and disappeared in the July 31 rewrite.

DR-0115 | Warning | Text | New | Plans & Subscription

The new plans article says self-serve customers can downgrade in Studio, but two other billing articles say Studio has no downgrade option

Understanding Self-Serve and Managed Plans · help.wellsaid.io/…/55524065567123-Understanding-Self-Serve-and-Managed-Plans

HELP ARTICLE

CURRENT

With a self-serve account, you can manage your subscription and billing directly in Studio, including upgrading, downgrading, and canceling your subscription.

SUGGESTED FIX

Match the existing billing articles, for example: "With a self-serve account, you can manage your subscription and billing directly in Studio, including upgrading and canceling. To move to a lower-cost plan, cancel your current subscription and re-subscribe to the lower plan using the same email address." Link to Managing Your Studio Subscription for the steps.

WHAT CHANGED

This article, published September 17 and updated September 29, says self-serve customers can downgrade directly in Studio. Upgrading Your Studio Subscription says "WellSaid doesn't offer self-serve downgrades," and Managing Your Studio Subscription says "Studio doesn't support switching directly to a lower-cost plan." Both tell customers to cancel and re-subscribe instead. A customer who follows the new article will look for a downgrade option that isn't there.

DR-0064 Warning Video

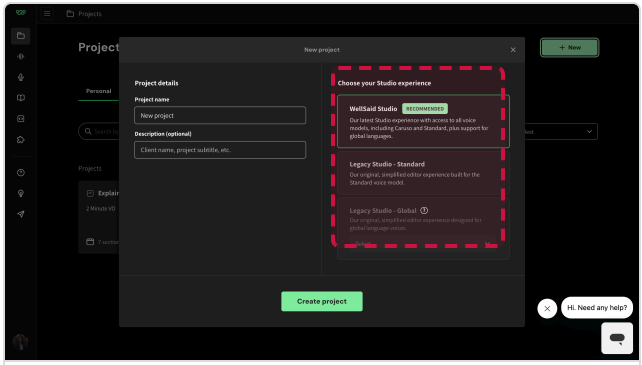

'Current / Future BETA' version dropdown has been restructured

Tutorial: Create Clips · https://www.youtube.com/watch?v=8S9M01NwEpw

ARTICLE SCREENSHOT

'Current' version dropdown in Create a new project modal

LIVE UI

right-side 'Choose your Studio experience' panel in the New project modal containing the three radio cards (WellSaid Stu

SUGGESTED FIX

The narrator says 'select the current version of Studio' but the Current/Future BETA dropdown was replaced by three radio cards under 'Choose your Studio experience' — 'WellSaid Studio (recommended)', 'Legacy Studio - Standard', 'Legacy Studio - Global'. The 'current' option was demoted to 'Legacy Studio - Standard' (which is what this tutorial actually demonstrates). A viewer following along will not find a 'current version' selector.

WHAT CHANGED

Current-app capture: 'New project' modal shows three radio cards -- 'WellSaid Studio' (RECOMMENDED), 'Legacy Studio - Standard', 'Legacy Studio - Global' (with additional language dropdown).

A recreation plan for this video is available in Drift Monitor.

DR-0080 Warning Text What's New

Legacy-migration preview article still uses future tense for the June 1, 2026 migration that has already gone live, and promises a guide "in June" that is already published

Migrating Legacy Projects to WellSaid Studio · help.wellsaid.io/…/51253958068755-Migrating-Legacy-Projects-to-WellSaid-Studio

HELP ARTICLE

CURRENT

Starting June 1, 2026, you'll be able to migrate legacy projects into WellSaid Studio — one at a time, at your own pace.

SUGGESTED FIX

The stated date has already passed. This older preview article (created 2026-04-29) should be rewritten in present/as-of framing (e.g. 'You can now migrate your legacy projects into WellSaid Studio — one at a time, at your own pace.') and the line 'We'll be sharing a complete migration guide in June.' should be replaced with a link to the now-published guide. Consider whether this preview article is still needed at all now that the full guide and FAQs exist, or redirect it.

WHAT CHANGED

Article 51253958068755 (last updated 2026-09-08) still reads 'Starting June 1, 2026, you'll be able to migrate legacy projects', 'Migration is not automatic. Starting in June, you'll be able to migrate projects one at a time', and 'We'll be sharing a complete migration guide in June.' The stated date has already passed. Migration is already live: the companion guide 51751205121299 (published 2026-05-15) uses present tense ('you can migrate your legacy projects') and the dated timeline table lists 'June 1, 2026 — Migration opens.' Readers are told migration is a future capability and that a complete guide is still forthcoming, when both already exist.

DR-0082 | Warning | Text | Marketing Site

Security page commits to WCAG 2.1 accessibility compliance "by 2025" — a deadline that has already passed

Most Secure Text to Speech AI Voice Generator | WellSaid · https://www.wellsaid.io/features/features-security

HELP ARTICLE

CURRENT

We are committed to meet WCAG 2.1 and other national standards, working towards compliance in these areas by 2025.

SUGGESTED FIX

The stated date has already passed. Either update the date to the current/next target year, restate as completed ('As of 2025, we meet WCAG 2.1...'), or remove the forward-looking deadline. A prospect or procurement/legal reviewer reading an overdue compliance commitment on the security page may read it as an unmet obligation.

WHAT CHANGED

This page (https://www.wellsaid.io/features/features-security; the prior /features/security page was removed). Its Accessibility section reads 'We are committed to meet WCAG 2.1 and other national standards, working towards compliance in these areas by 2025.' The stated date has already passed. The rest of the section is forward-looking ('working towards'), so the page implies the WCAG 2.1 goal is still in progress past its own deadline. Not present in the carried-forward finding set.

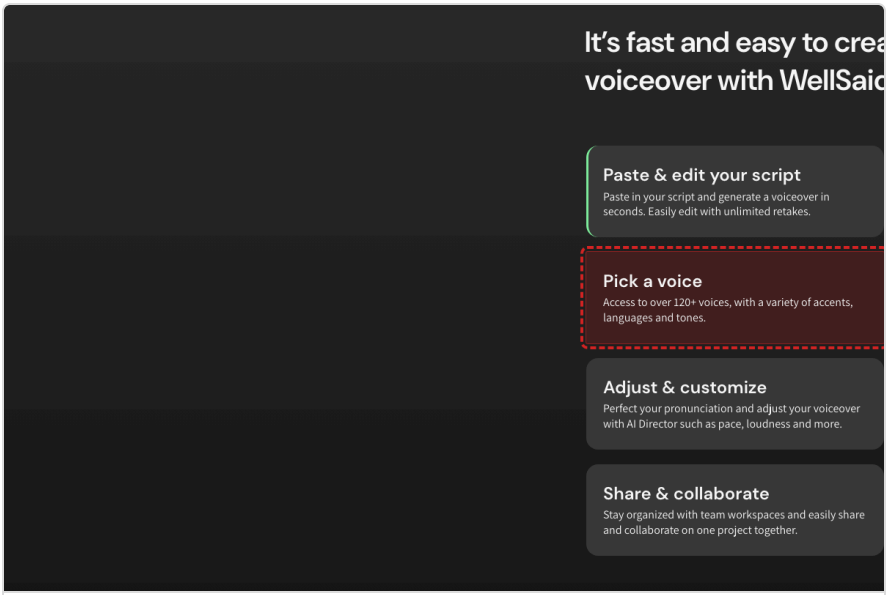

ARTICLE https://www.wellsaid.io/features/features-security **FIRST SEEN** 2026-06-21 — also in 15 prior scans

The size of the voice library is still advertised three ways across the site (120+, 240+ and 280+)

Advertising · https://www.wellsaid.io/solutions/advertising

HELP ARTICLE

CURRENT

Access to over 120+ voices, with a variety of accents, languages and tones.

SUGGESTED FIX

Settle on one voice-library total and use it on every page. Most pages, the homepage included, say 280+. If that's the current number, change this line to "Access to 280+ voices, with a variety of accents, languages and tones." and make the same edit on /features/ai-voices ("240+ realistic AI voices", used twice) and in the two blog posts that say WellSaid "offers more than 120 voices" and "more than 120 AI voices".

WHAT CHANGED

The Advertising page says "Access to over 120+ voices", /features/ai-voices (https://www.wellsaid.io/features/ai-voices) says 240+ twice, and the homepage, the Marketing page and every use-case page say 280+. Two blog posts still say "more than 120". The Marketing page was fixed this week and now says 280+ in every place.

DR-0086 Warning Text API

API free-trial length is stated two different ways: the Help Center says 14 days, the product website says 7 days

Requesting an API Key for WellSaid · help.wellsaid.io/…/39155609824275-Requesting-an-API-Key-for-WellSaid

HELP ARTICLE

CURRENT

Enjoy a 14-day trial period to explore and test our API capabilities.

SUGGESTED FIX

Confirm the correct API trial length, then update this article or the API landing page (https://www.wellsaid.io/text-to-speech-api) to match. The Release Notes also mention a "14-day trial", so update them too if 7 days is correct.

WHAT CHANGED

This Help Center article (updated June 29) says 'Enjoy a 14-day trial period to explore and test our API capabilities.' The public API page at wellsaid.io/text-to-speech-api says 'Signing up for an API trial is free and easy. You'll have 7 days to try out all of our features.' Both describe the same API trial, so a developer comparing the two can't tell whether it's 7 or 14 days.

DR-0088 Warning Text Support

Support article promises chat replies “within 1 hour”, but the pricing page says Business chat is a 4-hour SLA (only Enterprise/Priority is 1 hour)

Finding WellSaid Support Options · help.wellsaid.io/…/39078756560915-Finding-WellSaid-Support-Options

The WellSaid Help Center is a self-serve knowledge base with guides, how-tos, and answers to commonly asked questions — available anytime, no login required.

Onboarding support

Business and Enterprise accounts may include an onboarding kickoff call to help your team get started with WellSaid Studio best practices.

Response and resolution times

Chat: Within 1 hour during open hours.
Email: Usually within 1 business day.

If an issue can't be resolved during a chat or email conversation, your support agent will keep you updated on expected resolution times.

Still need help? Email us at support@wellsaidlabs.com or use the **chat icon** in WellSaid Studio during open hours.

FAQs

Q: Is live chat available on all plans?
A: No. Live chat is available for Business and Enterprise customers only. All customers can reach Support via email.

HELP ARTICLE

CURRENT

Chat: Within 1 hour during open hours.

SUGGESTED FIX

Align the chat response time between the Help Center and the pricing page. The pricing page distinguishes Business "Live Chat (4 hour SLA during business hours)" from Enterprise "Priority Chat (1 hour SLA during business hours)", but this support article gives a single blanket "within 1 hour" for all chat customers. Either scope the 1-hour figure to Priority/Enterprise chat or update the pricing SLA to match.

WHAT CHANGED

This Help Center article, edited on 2026-09-08, lists chat as available for Business and Enterprise customers and, under "Response and resolution times", states "Chat: Within 1 hour during open hours." The pricing page (https://www.wellsaid.io/ai-voice-pricing) instead promises Business "Email (1 business day SLA) and Live Chat (4 hour SLA during business hours)" and reserves the 1-hour figure for Enterprise: "Priority Chat (1 hour SLA during business hours)". A Business customer reading the support article expects a 1-hour chat reply that the pricing SLA doesn't guarantee.

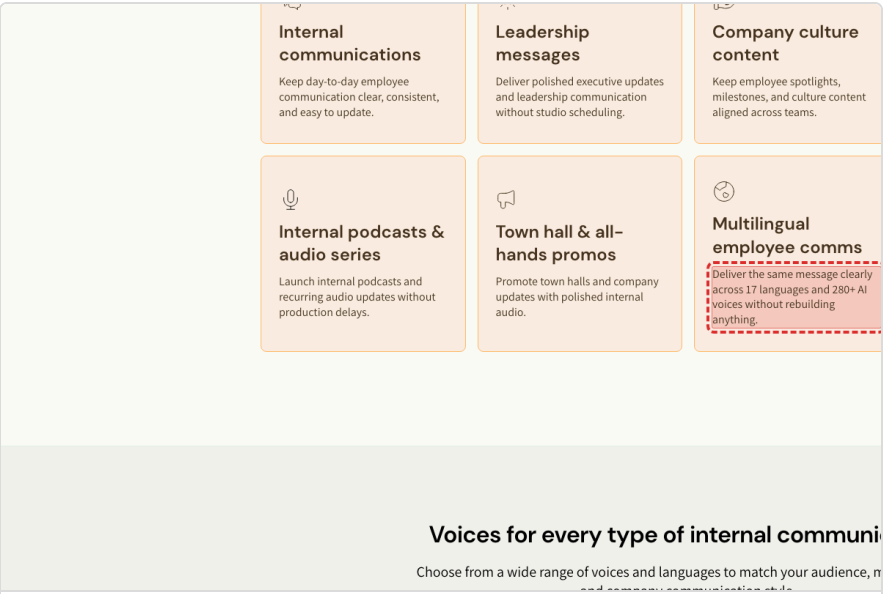

ARTICLE help.wellsaid.io/…/39078756560915-Finding-WellSaid-Support-Options

SOURCE https://www.wellsaid.io/ai-voice-pricing **FIRST SEEN** 2026-07-12 — also in 12 prior scans Model confidence: 0.72

DR-0089 Warning Text Marketing Site

The number of supported languages is given four different ways across the site — 17, 18, 30+ and 50+

AI Voice for Corporate & Internal Communications | WellSaid · www.wellsaid.io/…/corporate-communications

HELP ARTICLE

CURRENT

Deliver the same message clearly across 17 languages

SUGGESTED FIX

Confirm the current language total and use it everywhere, or say plainly what is being counted. This page promises 17 languages, but the "Supported languages & accents" table lower on this same page lists 18 (Arabic, Cantonese, Czech, Danish, Dutch, English, French, German, Italian, Japanese, Korean, Mandarin, Persian, Polish, Portuguese, Spanish, Swedish, Turkish). /industries/voice-ai-marketing says "support for 30+ languages", the Help Center's List of WellSaid Voices says "Global Voices in 30+ languages", and the homepage, corporate-training and social-media-content pages say 50+ — a figure that appears to include regional accents. Paste-ready for this page: "Deliver the same message clearly across 18 languages".

WHAT CHANGED

This page was updated this week. Its "Multilingual employee comms" tile reads "Deliver the same message clearly across 17 languages and 280+ AI voices without rebuilding anything", while the "Supported languages & accents" table on the same page lists 18 languages. Two other figures are in circulation: 30+ (on /industries/voice-ai-marketing and in the Help Center's List of WellSaid Voices) and 50+ ("Access 50+ languages including Spanish, French, Japanese, Korean, and more" on the homepage, "50+ languages & accents" on corporate-training and social-media-content). A communications lead checking whether their regional languages are covered gets 17, 18, 30+ or 50+ depending on the page. The voice-count half of the same sentence is covered separately by 'marketing-voice-count-inconsistency-120-240-280'.

DR-0092 Warning Text Getting Started

The pricing page dropped WAV and OGG downloads from the Pro plan in late July, but the getting-started guide still tells everyone to pick .mp3, .wav, or .ogg

Getting Started with WellSaid Studio · help.wellsaid.io/…/39187892094099-Getting-Started-with-WellSaid-Studio

HELP ARTICLE

CURRENT

Choose a file format: .mp3, .wav, or .ogg.

SUGGESTED FIX

Add the plan condition to this step so it matches the pricing page, using the wording already used in Downloading Sections and Projects. Paste-ready: "Choose a file format: .mp3, .wav, or .ogg. MP3 is available on all plans. OGG and WAV require a Business or Enterprise plan." The same change is needed in Updating Global Download Settings (help.wellsaid.io/…/39078836537619-Updating-Global-Download-Settings), which tells readers to "Choose your preferred file format from the list (e.g., MP3, WAV, OGG.)" with no plan condition. If Pro is in fact meant to keep WAV and OGG, the pricing page's Export formats row is the row to correct instead.

WHAT CHANGED

The pricing page's Export formats row now reads "MP3MP3MP3, TXTMP3, WAV, OGG, TXTMP3, WAV, OGG, TXT" across Trial, Starter, Pro, Business and Enterprise — the Pro column changed from "MP3, WAV, OGG, TXT" to "MP3, TXT" after the July 26 scan. This guide, rewritten on 2026-07-25, still says "Choose a file format: .mp3, .wav, or .ogg." with no plan condition, and Downloading Sections and Projects says "MP3 is available on all plans. OGG and WAV require a Business or Enterprise plan." A Pro subscriber following the getting-started steps will look for a .wav option that their plan no longer offers.

DR-0094 Warning Text Voices

The new intro promises every voice is tagged with a speaking style, but more than half the list is tagged "(Partner)" — a voice model, not a style

List of WellSaid Voices · help.wellsaid.io/…/39112914360467-List-of-WellSaid-Voices

HELP ARTICLE

CURRENT

each tagged with the style it supports — Narration, Conversational, Promo, or Character

SUGGESTED FIX

Either tag the Global Voices with their actual speaking styles, or change the intro so it stops promising something the list doesn't deliver. Paste-ready alternative: "This list covers all English voices plus Global Voices, tagged with the speaking style each one supports — Narration, Conversational, Promo, or Character. Global Voices supplied through our partner network are tagged Partner; browse them in the Voices library to hear the styles available." It would also help to add a one-line note explaining what Partner means, since Creating Audio at Different Sample Rates treats Partner as a voice model alongside Standard and Caruso.

WHAT CHANGED

The intro paragraph added to this article in its August 7 update says the list covers voices "each tagged with the style it supports — Narration, Conversational, Promo, or Character". Of the 205 voices listed, 109 are tagged " (Partner)" instead — every Arabic, Chinese, Czech, Danish, Dutch, Italian, Japanese, Korean, Persian, Polish, Portuguese, Swedish and Turkish voice, plus most Spanish, French and German ones. Partner is a voice model, not a style: Creating Audio at Different Sample Rates says "Standard and Partner voices always render at 24 kHz", and Exploring Languages, Accents, and Styles says "Voices are organized into four speaking styles" with no Partner among them. Someone looking for a Conversational Spanish voice can't tell from this list which Spanish voices offer one.

DR-0095 Warning Text What's New

Customers running low on minutes are told add-on packs are still coming and to contact Support — but add-ons shipped in July and can be bought self-serve

Understanding June 2026 Pricing and Plan Changes · help.wellsaid.io/…/52476451642003-Understanding-June-2026-Pricing-and-Plan-Changes

HELP ARTICLE

CURRENT

Add-on minute packs are also planned for a future release.

SUGGESTED FIX

Replace that line with the option customers can actually use today. Paste-ready: "You can also buy an add-on to top up your minutes without upgrading — see Adding More Minutes to Your Plan." and link help.wellsaid.io/…/53255263259283-Adding-More-Minutes-to-Your-Plan. Drop the "Contact Support if you need additional minutes in the interim" sentence, since that route is no longer needed. While in this article, the opening line "WellSaid is updating its individual plans and how usage is measured in June 2026" also reads as an upcoming change now that June has passed — reword it to "As of June 2026, WellSaid updated its individual plans…".

WHAT CHANGED

This article was last updated on September 8 and still answers "I'm running low on downloaded minutes" with "Add-on minute packs are also planned for a future release. Contact Support if you need additional minutes in the interim." Add-ons have been live for a month: the July 2026 Release Notes entry reads "Add-ons let you add extra minutes to your current plan – active the moment you buy", the article Adding More Minutes to Your Plan walks through buying one from Account Settings, Understanding Your Download Limit already points readers there, and every plan card on the pricing page now says "Extra minutes available". Customers who hit their limit are being sent to Support for something they can buy themselves in three clicks.

DR-0098 | Warning | Text | Team Management and Setup

The admin onboarding guide still says the heart icon adds a voice to Team Voices — it's the bookmark icon, and the heart saves to personal Favorites instead

Getting Started for Team Admins · help.wellsaid.io/…/39177116852243-Getting-Started-for-Team-Admins

HELP ARTICLE

CURRENT

Click the heart icon on the voice card to add it to Team Voices.

SUGGESTED FIX

Change this step to "Click the bookmark icon on the voice card to add it to Team Voices," matching Building Your Team Voices List. While you're in this step, also drop "or All tabs" — every rewritten voice article now sends readers to the Explore tab only.

WHAT CHANGED

Building Your Team Voices List, updated on August 7, says "Click the bookmark icon on the voice card to add it to Team Voices" in both of its paths, and Favoriting a Voice spells out the difference: "Click the heart icon on the voice card to add it to Favorites" followed by "Note: Each voice card also has a bookmark icon next to the heart. That one adds the voice to Team Voices, a shared list for your team — it's separate from your personal Favorites." A new admin following this onboarding guide clicks the heart, and the voice lands in their own Favorites rather than the shared team list they were setting up. This page also still says "Choose a voice and style you wish to favorite from the Explore or All tabs" — the All tab was dropped from both of the rewritten voice articles.

DR-0100 Warning Text Voice Delivery & Pacing

The Emotional Presets FAQ answers a different question than the one it asks — and reverses its earlier answer without saying so

Using Emotional Presets · help.wellsaid.io/…/39047202485779-Using-Emotional-Presets

HELP ARTICLE

CURRENT

A: Yes. You can apply presets across multiple sections.

SUGGESTED FIX

Either restore an answer that addresses the question asked — "No. Only one Emotional Preset can be active per section at a time; applying a new preset replaces the previous one" — or change the question to "Can I apply a preset to more than one section?" so the "Yes" answer fits. Don't leave both mismatched.

WHAT CHANGED

The question is "Can I apply more than one preset to a section?" but the answer talks about applying presets across multiple sections — a different thing. Read literally, it also contradicts the rest of the page: the Removing a preset steps describe a single Reset icon that returns the voice to its default, which only makes sense with one preset per section. Until the July 31 rewrite this FAQ answered "No. Only one Emotional Preset can be active per section at a time. Applying a new preset replaces the previous one."

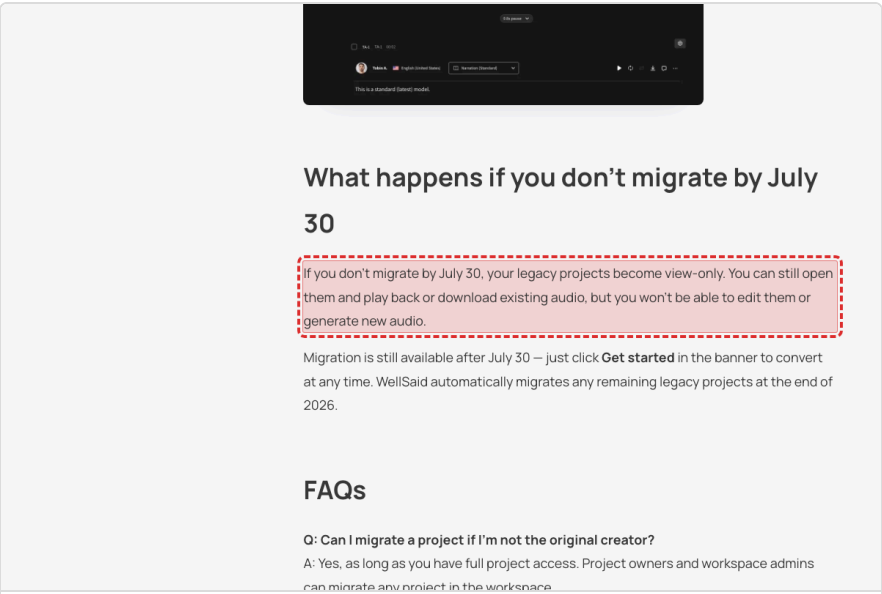

ARTICLE help.wellsaid.io/…/39047202485779-Using-Emotional-Presets **FIRST SEEN** 2026-08-02 — also in 9 prior scans

DR-0101 Warning Text Past Updates

The July 30 lock-out date has passed, but both migration articles still describe it as something that might happen

Migrating Your Legacy Projects to WellSaid Studio · help.wellsaid.io/…/51751205121299-Migrating-Your-Legacy-Projects-to-WellSaid-Studio

HELP ARTICLE

CURRENT

If you don't migrate by July 30, your legacy projects become view-only.

SUGGESTED FIX

Switch both articles to past tense now that the date has passed — for example: "As of July 30, 2026, any legacy project that hadn't been migrated is now view-only. You can still open it, play back, and download existing audio, but you can't edit it or generate new audio until you convert it. Migration is still available — click Get started in the banner on any legacy project." On Legacy Studio Migration FAQs, the same change applies to "Do I have to migrate before July 30?" and "You can keep editing and rendering in legacy projects normally up until July 30."

WHAT CHANGED

The July 30, 2026 transition date has passed. Both articles still read as advance notice: this one asks "What happens if you don't migrate by July 30," and Legacy Studio Migration FAQs says "You can keep editing and rendering in legacy projects normally up until July 30" and "If a project does become view-only on July 30." A customer opening a locked project today can't tell from either article whether the lock is expected or a fault. This is the same pattern as the existing finding on the June 1 migration launch article (51253958068755), but a different date on two different pages.

DR-0102 Warning Text Downloading & Exporting

Combining Sections calls 48 kHz "the highest supported sample rate" two lines after explaining what happens to 96 kHz files

Combining Sections · help.wellsaid.io/…/39404298753299-Combining-Sections

HELP ARTICLE

CURRENT

A: The combined file uses 48 kHz, the highest supported sample rate.

SUGGESTED FIX

Trim the claim so it only describes the case being asked about: "The combined file uses 48 kHz — the higher of the two rates." WellSaid supports up to 96 kHz on Enterprise, so 48 kHz isn't the ceiling.

WHAT CHANGED

Two FAQs above this one on the same page deal with 96 kHz files: "Files rendered at 96 kHz are limited by total file size" and "The 96 kHz files will be downsampled in the combined output." The pricing page lists Enterprise sample rates as "24 kHz, 48 kHz, 96 kHz." An Enterprise customer reading this FAQ could reasonably conclude 96 kHz isn't offered. This line carried over unchanged when the article was renamed from Using the Combine Tool on August 1.

DR-0103 Warning Text Marketing Site

The new free-plan landing page lists commercial rights as part of the free tier — the pricing page says the free tier has none

Free AI Voice Generator & Text to Speech | WellSaid · https://www.wellsaid.io/free-ai-voice-generator

HELP ARTICLE

CURRENT

Paid plans add more minutes, commercial rights, and advanced features.

SUGGESTED FIX

Remove "Commercial rights" from the Trial column of the plan comparison on this page so it matches the pricing page, which reads "3 download minutes per month (no commercial rights)". Keep it on Starter and above, where it appears as "Full commercial rights". While the plan grid is open, it also helps to settle on one name for this tier — this page calls it "Free plan", "Free" and "Trial" in three different places, and the pricing page calls it "Trial".

WHAT CHANGED

This page went live this week. The sentence above the plan comparison says "Paid plans add more minutes, commercial rights, and advanced features" — but the comparison directly below lists the free tier as "Trial $0/mo, No credit card required, 3 min/mo downloads, 10 min of generation, 3 projects, Commercial rights, Caption files". The pricing page describes the same tier as "3 download minutes per month (no commercial rights)". Every other row on the free column matches the pricing page (3 projects, 10 minutes of generation), so commercial rights is the one line out of step. Someone signing up for the free plan from this page could reasonably believe they can publish the audio commercially.

DR-0104 Warning Text Integrations

Two articles rewritten this week name the wrong plan: Adobe Express is sold from Pro up, not Starter, and Collaborator seats are listed on Business as well as Enterprise

WellSaid Studio for Adobe Express · help.wellsaid.io/…/39187648788243-WellSaid-Studio-for-Adobe-Express

HELP ARTICLE

CURRENT

You'll need a Starter plan or higher.

SUGGESTED FIX

Change this prerequisite to "You'll need a Pro plan or higher." to match the pricing page, where Adobe Express integration first appears on the Pro card and the Adobe integrations row is blank for Trial and Starter. On Collaborator Role (https://help.wellsaid.io/hc/en-us/articles/43167117143315-Collaborator-Role), the line "Collaborator licenses are available as an add-on to Enterprise subscriptions" needs the same treatment — the pricing page lists "Collaborator seats" in the Business plan's feature list, so either add Business to the article or take Collaborator seats off the Business card.

WHAT CHANGED

Both articles were rewritten on 2026-08-05/07 and both added a plan requirement that the pricing page contradicts. This article now opens with "You'll need a Starter plan or higher", but on wellsaid.io/ai-voice-pricing the Starter card lists no Adobe integration at all, the Pro card lists "Adobe Express integration", and the comparison table's Adobe integrations row reads "Adobe Express integration | Adobe Premiere Pro & Express integrations | Adobe Premiere Pro & Express integrations" across Pro, Business and Enterprise only. The new /free-ai-voice-generator page agrees, showing Adobe Express integration on Pro. Separately, Collaborator Role now leads with "Collaborator licenses are available as an add-on to Enterprise subscriptions", while the pricing page's Business card reads "Everything in Pro, plus: Purchase up to 5 seats, Team workspace, Collaborator seats, Live chat support". A Starter subscriber installs the Adobe add-on and finds it unavailable; a Business customer is told to buy Enterprise for something their plan already lists.

DR-0105 Warning Text Collaboration and Permissions

The permissions article tells admins that view-only members can revoke anyone's access — including the project owner's

Managing Team Permissions on Projects · help.wellsaid.io/…/39112841273235-Managing-Team-Permissions-on-Projects

3. Choose from the following options:
   - **Full Access**: Allows complete project control within the workspace, including sharing access, editing, and downloading. Use this option when team members need comprehensive control over the project.
   - **Can View**: Enables viewing and listening to voiceovers without editing capabilities plus downloads. Ideal for team members who only need access to review projects.
4. Click **Save**, and your team member(s) will now have access.

Removing access to a Workspace

Anyone with Full or View Edit Access can remove a team member's access to a project entirely, including the project owner. Use this option when team members no longer require access to the project.

1. Navigate to the **Workspace** in WellSaid Studio.
2. Click on the **ellipses (...) menu** and select **Settings**.
3. Find the team member whose access you want to revoke.
4. Click the **drop-down menu** next to their name, then choose **Remove**.
5. Click **Save** to make the change.

Related to

teams | admin | permissions

HELP ARTICLE

CURRENT

Anyone with Full or View Edit Access can remove a team member's access to a project entirely, including the project owner.

SUGGESTED FIX

Name the permission levels the article itself defines, and limit removal to the one that allows it. Paste-ready: "Anyone with Full Access can remove a team member's access to a Workspace, including the project owner. Can View members can't change access for themselves or anyone else." The Removing access section higher up the page has the same problem — "Anyone with Full Edit Access can remove a team member's access" should read "Anyone with Full Access". Neither "Full Edit Access" nor "View Edit Access" is one of the three levels this article lists (Full Access, Can Edit, Can View).

WHAT CHANGED

This article was rewritten on August 7. It defines Can View as "Enables viewing and listening to voiceovers without editing capabilities plus downloads. Ideal for team members who only need access to review projects" — then, two paragraphs later, tells readers that "Anyone with Full or View Edit Access can remove a team member's access to a project entirely, including the project owner." Read as written, a review-only member can lock the project owner out of their own work. It also invents two permission names the article never defines: the personal-file section says "Anyone with Full Edit Access", the Workspace section says "Full or View Edit Access", while the permission picker in both sections offers Full Access, Can Edit, and Can View. An admin setting up review access for stakeholders can't tell from this page what a Can View member is actually able to do.

DR-0106 Warning Text What's New

The Release Notes link to the Studio announcement no longer opens — the article it points to was taken down during the Help Center rewrite

Release Notes · help.wellsaid.io/…/39720425068051-Release-Notes

New Features

Apply Cues Across Multiple Sections

Script editing just got faster and more efficient with bulk cues. Select multiple sections in your project and apply a cue from the sidebar to update them all at once. This makes it easy to apply pacing, pitch, loudness, or emotional presets across an entire script in seconds.

Studio Update: A Simpler Way to Create Audio

We've updated WellSaid Studio to make creating audio across models and languages easier and more flexible.

What's new

- One unified, **script-first experience** for all voice models
- No more choosing project types based on model or language
- Model selection now happens within the project, not at creation
- Support for importing scripts written in **non-Latin character sets**, including Chinese, Arabic, Korean, and more

What's staying the same

- Existing projects remain accessible and unchanged
- Legacy project types are still accessible

HELP ARTICLE

CURRENT

We've updated WellSaid Studio to make creating audio across models and languages easier and more flexible.

SUGGESTED FIX

Point this link somewhere that still exists. "WellSaid Studio" in this sentence links to article 48785974467731 ("Introducing the New WellSaid Studio"), which was taken down in early August — Getting Started with WellSaid Studio (help.wellsaid.io/…/39187892094099-Getting-Started-with-WellSaid-Studio) is the natural replacement, or remove the link and leave the text plain. Two other pointers left over from the same rewrite are worth fixing in the same pass: Adding Longer Pauses in Your Script closes with "See Control Pauses Between Sections and Continuous Playback for more", but that guide was split into Controlling Pauses Between Sections and a separate Using Continuous Playback; and Organizing Your Work with Projects links to Team Collaboration (article 39176886765075), which is no longer reachable to signed-out readers — worth confirming whether that was intentional.

WHAT CHANGED

The "Studio Update: A Simpler Way to Create Audio" entry links the words "WellSaid Studio" to https://help.wellsaid.io/hc/en-us/articles/48785974467731. That article, "Introducing the New WellSaid Studio", is still absent from the Help Center; requesting it returns "RecordNotFound — Not found", while a live article requested the same way returns normally. Nine articles were removed from the Help Center in the Aug 5–7 rewrite, and this is the one that still has an inbound link from a page customers use to catch up on what changed.

ARTICLE help.wellsaid.io/…/39720425068051-Release-Notes

DR-0107 Warning Text Voices

New paragraph promises the free tier the full English voice library — the pricing page limits it to a curated selection

Exploring Languages, Accents, and Styles · help.wellsaid.io/…/39079854241299-Exploring-Languages-Accents-and-Styles

HELP ARTICLE

CURRENT

Self-serve plans (Free through Business) include the full range of English voices

SUGGESTED FIX

Start this claim at the first paid tier, since that is where the pricing page grants it. Paste-ready: "Paid self-serve plans (Starter through Business) include the full range of English voices — every accent and style listed below. The free Trial plan is limited to a curated set of voices." It is also worth picking one name for the free tier: the pricing page calls it "Trial", and the new free-plan landing page calls it "Free plan", "Free" and "Trial" on a single screen.

WHAT CHANGED

This paragraph was added to the article in its August 7 update. The pricing page describes the free tier as "3 download minutes per month (no commercial rights)" plus "Curated voice actors", and reserves "All English voices" for the Starter and Pro cards. So the one tier in the stated range that doesn't get the full English library is the one the sentence starts from. A prospect on the free plan reads this article, goes looking for a specific accent or style listed below it, and doesn't find it.

DR-0108 Warning Text Marketing Site

The "Supported languages & accents" list offers a New Zealand English accent that WellSaid doesn't have, and leaves out two it does

Most Realistic AI Voice Generator | WellSaid · https://www.wellsaid.io/

HELP ARTICLE

CURRENT

English(New Zealand)

SUGGESTED FIX

Rebuild the accent list from the Help Center's List of WellSaid Voices, which is the maintained inventory. Remove English (New Zealand) — there are no New Zealand voices in Studio — and add the two accents that are missing: English (Mexico) (Hannah A., Lorenzo D., Paula R.) and English (United Kingdom) (Alan T., Benedict M., Fiona H., Frankie P., Melissa V., Oliver S. and others). Separately, the voice card on /text-to-speech-api labels Issa B. as "English (NZ)"; every other page and the Help Center list Issa B. under English (South Africa), so that card should read "English (ZA)".

WHAT CHANGED

The "Supported languages & accents" list appears on fifteen marketing pages, including the homepage (open it with "View all languages", then the Accents tab), and every copy of it lists English (New Zealand). The Help Center's List of WellSaid Voices — which is organised by accent and names every voice — has no New Zealand section at all. The only New Zealand label anywhere on the site is a single voice card on /text-to-speech-api reading "Issa B. English (NZ)", and the homepage, /features/ai-voices, /ai-voice-use-cases/video-production and /free-ai-voice-generator all label that same voice "Issa B. English (ZA)", matching the Help Center's English (South Africa) section. In the other direction, the list omits English (Mexico) even though this page's own hero plays "Hannah A. English (MX)" and the Help Center has an English (Mexico) section with three voices, and it omits English (United Kingdom) despite UK voices being demonstrated on this page ("James B. English (UK)") and across the site. Someone shortlisting vendors for a New Zealand audience would choose WellSaid and find no voice to use, and someone who needs a UK or Mexican English voice may rule WellSaid out for lacking one it has.

DR-0111 Warning Text What's New

The August release note calls the button “Generate All” — the how-to article it points to says the button is called “Generate”

Release Notes · help.wellsaid.io/…/39720425068051-Release-Notes

HELP ARTICLE

CURRENT

Access it anytime with the Generate All button in Studio.

SUGGESTED FIX

Use the same button name as the how-to article: "Access it anytime with the Generate button in the top-right corner of Studio." If the button really is labelled Generate All in the product, then Generating Audio for All Sections (help.wellsaid.io/…/52473662638739-Generating-Audio-for-All-Sections) is the page to correct instead — it names the button three separate times as Generate. While you're editing this entry, "generate every section in your project in one click" is worth changing to "generate every remaining section in one click": the how-to article's FAQ says sections you've already generated are skipped, not re-run.

WHAT CHANGED

The August 2026 release note says "Access it anytime with the Generate All button in Studio." The article it announces, Generating Audio for All Sections, calls the same control Generate every time it names it: "Click on Generate in the top-right corner of the Studio", "the counter next to the Generate button counts down as each section finishes", and "If the counter still shows sections left, click Generate again to retry them." That article's wording is unchanged this week, so the two names still disagree. Someone who reads the release note and then goes looking for a Generate All button won't find one under that name.

DR-0114 Warning Text Marketing Site

The rewritten Marketing page promises unlimited downloads with no usage caps, but every plan now caps downloaded minutes (and Starter caps projects)

AI Voice Generator & Text to Speech for Marketing | WellSaid · https://www.wellsaid.io/industries/voice-ai-marketing

HELP ARTICLE

CURRENT

Unlimited retakes, downloads & projects

SUGGESTED FIX

Change the heading to match the current plans, for example: "Unlimited generation on every paid plan", with body copy such as "Generate and revise as often as you need; your plan sets how many minutes of finished audio you can download." Make the same change on the Healthcare page ("Unlimited generation, downloads & projects") and the Manufacturing page ("unlimited generation and downloads"), and change "Easily edit with unlimited retakes." on the Advertising page to "Easily edit with unlimited generation."

WHAT CHANGED

Since the June 2026 plan changes, usage is measured in downloaded minutes: every plan, Enterprise included, comes with a set number of download minutes (see https://www.wellsaid.io/ai-voice-pricing), and Starter is limited to 10 projects. The Help Center article help.wellsaid.io/…/52476451642003-Understanding-June-2026-Pricing-and-Plan-Changes says "Your plan includes a set number of audio minutes you can download each month." This week's rewrite of the Marketing page also brought back the old "retakes" wording, which the rest of the site now calls "generation". The page also says "without usage caps or production limits."
